

Oracle transformed your business. Now it's time to transform your B2B exchange.

Achieve improved operating performance with Oracle-EDI/HQ, a tightly integrated automation and analytics engine that energizes your B2B Xchange.

Our EDI/HQ SaaS solution allows companies to leverage Oracle's EDI Gateway and Oracle E-business suite to the fullest at a lower total cost of ownership.

Enhanced visibility combined with our ability to manage large volumes of transactions and deliver clear EDI or XML data simplifies your business processes and allows you to turn your attention to more pressing strategic priorities.

EDI/HQ Advantages

- **Expertise.** Our EDI experts have led hundreds of EDI integrations through E-Commerce Gateway and XML Gateway. We've built relationships with Oracle VARs throughout the U.S. to ensure we deliver solutions that meet your most demanding and complex needs.
- **Powerful mapping and integration.** Avoid the cost and complexity of customizing your EBS implementation.
- **Advanced dashboards and alerts.** You gain complete control and ability to manage by exception.
- **Onboard trading partners.** Automatically onboard trading partners making a once complex task quick and simple.
- **Flexible.** Solution goes beyond the integration capabilities of the XML Gateway and E-Commerce Gateway ensuring you never outgrow your solution.

"The Oracle integration with EDI/HQ was easy thanks to the intuitive mapping software."
