

# Improve Your Bottom Line With EDI

Electronic data interchange, or EDI, continues to prove its major business value by lowering costs, improving speed, accuracy and business efficiency.

Here are just a handful of ways you can save with a properly integrated EDI system.

## Fines and Chargebacks

Large trading partners have all the power when it comes to ensuring compliance with their complex business rules. When you don't play by the rules they can impose costly fines and chargebacks, which could be a problem if you're still using a legacy EDI system.

## Speed and Accuracy

Organizations that have the wrong EDI system or a poorly configured one are compromising their staff's time because they are consumed with oversight of the system and handling transactions manually, all while straining the customer relationship.

## Trading Partner Onboarding

If you have delays in onboarding trading partners then you have growing costs that could quickly impact revenue.

If you're just getting started with EDI, feel free to download our [EDI 101 Guide](#) and/or [EDI Buyer's Guide](#) or contact us at [sales@1edisource.com](mailto:sales@1edisource.com) or [877.334.1334](tel:877.334.1334).
